

CAREER PROFILE

16 years of experience in Systems Administration, DevOps and Network engineering fields.

Linux Systems Engineer with:

- knowledge at UNIX based OS (CentOS, Ubuntu, Mint, Debian & FreeBSD)
- experience at Virtualization (VirtualBox, VMware, ESXi, Hyper-V)
- passion to CM (Ansible, Git, Bitbucket)
- slight experience in cloud (AWS EC2, S3, CloudFront, Route53, etc.)
- slight experience to work on CI/CD setup (Jenkins)

Cloud:

- AWS, Amazon EC2 Container Service, Amazon Simple Storage Service (S3);
- Amazon Web Services (AWS) and Heroku;
- Technologies: Datacenters, Internet, Networking, Security, Structured storage;
- Virtualization Tools: Docker, KVM, Oracle VM, VMware ESXi, VMware vSphere, Windows Server Virtualization with Hyper-V;

DataBases:

- MSSQL Server, MySQL, MariaDB, MongoDB, Oracle, SQLite, Firebird, Redis, DB2, PostgreSQL;
- replication, backup and restore DB.

Programming:

- scripting Languages: Bash, Python, PowerShell;
- now began studying RoR (Ruby on Rails) and GOLang (in future plans);
- studied HTML/XHTML/CSS and little PHP.

Other Technology's:

- VPN: OpenVPN, pptp, ipsec, wireguard end etc. ;
- Storage: CIFS, Ext2/3/4, FAT, FAT32, NFS, NTFS;
- Network Protocols: DNS, DHCP, etc.;
- Interfaces: Ethernet, FibreChannel, WiFi, etc.;
- Microsoft Technologies: Operating Systems: Windows Server 2008 (R2)/2012 (R2)/2016;
- Software Configuration Management: Version Control Systems: Git, GitHub, TFS.

Artem Koshlatyi

Senior System Administrator / IT
Engineer / DevOps

EDUCATION

**National Technical University
"Kharkiv Polytechnic Institute"**

Kharkiv, Ukraine
2013

STEP Computer Academy

Odessa, Ukraine
2004

LANGUAGES

Ukrainian (Native)

Czech (Beginner)

English (Intermediate, good writing
and reading skills)

INTERESTS

Cycling

Gastronomic tourism

Cooking delicious food

Watch movies with friends

EXPERIENCES

System Administrator (with DevOps & Network Engineer tasks)

2018 - 2021

Product company

- managed and created new hosts for the existing VMWare cluster in data centers in Europe, USA, Australia
- implement, manage and support backup system VeeamBackup
- manage web servers with web applications based on Apache, Nginx, IIS, etc.
- implement and support VPN tunnels (IPsec) between gateways in different geo locations
- implement and support VPN tunnels (OpenVPN) for connect customers to local resources
- monitoring OS systems and active hardware with Zabbix

Technical Support Engineer L2

2015 - 2017

Software company

A few months later I worked in the development department.

- supported and managed Web servers with applications and Databases. Solved complex technical problems encountered by customers
- Implemented a system for monitoring IT infrastructure of the company and customer systems
- develop automation scripts in PowerShell (for Windows Servers)
- develop installation packages based on the Windows Installer Xml (WiX) toolset for the company's main web applications

Technical Engineer / System Administrator

2015

Industrial company

- development of the project and implementation of a video surveillance system in the presence of data storage in the cloud
- installation and maintenance of a unified accesscontrol system (ACS) in the branches and the main office of the company
- configure and maintenance of servers and PCs in the company

IT Engineer

2013 - 2015

in several companies

- Supported SOHO network equipment: MikroTik, Linksys, D-Link, TP-Link; Virtual network (vlan) Cisco based
- Managed and supported Windows Server 2008/2012 environment (including AD, DNS, DHCP, etc.)

Technical Specialist (System Administrator)

Information and Computing Center

Was engaged in worked on the maintenance of computing equipment and software.

- Managed Windows Server 2003/2008, including mail servers (IBM Lotus Domino) and application server
- Windows-based network support of over 100 PCs
- introduction (from scratch) of the corporate automated accounting system at the enterprises of the region, as well as its integration with the banking system;

 MY ACHIEVEMENTS

Participated in various projects, here are some

- implementation (from scratch) of a corporate automated accounting system in enterprises
- implementation, support and subsequent maintenance of an automated personnel accounting system in enterprises.

 SKILLS & PROFICIENCY

UNIX based OS

DataBases

Virtualization
